INNOVATION DEVELOPMENT. NOVETEX - id.N naturally fusion offers a sophisticated and exceedingly luxurious range of cashmere blends, tailored from the pure collection using twists and neps. By combining cashmere with other premium fibres, we bring you a versatile and dynamic range of premium yarns. Blending natural eco fibres with other premium fibres also bring you beautifully refined yarns for multifunctional garments, with sustainable and supremely soft cores. We source our natural animal fibres, both rich and raw, from free-range farms where the animals are responsibly cared for; paying respect to both animal and environment means our yarns are sustainable and eco-friendly.

Id.N redefines the meaning of innovation in yarn development, through extensive exploration and continuous refinement of sourcing, blending, twisting and colour evolution. With over 40 years of perfecting our skills within yarn innovation, we have built a global reputation for being world leaders in pioneering sustainable yet high-quality yarns. At Novetex our underlying mission for all that we do revolves around our ongoing and intensive commitment to sustainability and our environment. Id.N yarns aim to redefine the meaning of luxury by fusing together beauty and elegance with sustainable practices – for which we have become industry leaders in.
